Author index

Barbier, A. see Girard, J., 167
Bauer, D. Contribution to the quantification of the conditioning effects of hair dyes, 113
Baxter, P. M. The evaluation of underarm deodorants, 85
Beck, J. P. see Bauer, D., 113
Björnberg, A. Refatting rate of human hair lipids after exposure to selenium disulphide detergents, 1
Blakeway, J. M. Substantivity of perfume materials to hair, 15
Brudney, N. see Scandel, J., 157
Cooke, M. A. Dermatology and the cosmetic industry, 247
Cox, A. R. see Fearnley, C., 97
Dikstein, S. see Hartzshtark, A., 141
Etienne, J. J. see Pham Duc, T. L., 29
Fabrizi, G. see Björnberg, A., 7
Fearnley, D. A new microbiological approach to the assessment of underarm deodorants, 97
Flynn, G. L. see Walters, K. A., 231
Friend, J. V. see Lock, S. O., 39
Giannaccini, B. see Saettone, M. F., 201
Giauffret, J. Y. see Guillot, J. P., 255
Girard, J. Contribution à l'étude expérimentale de la séborrhée. Implications éventuelles en cosmétologie, 167
Gonnet, J. F. see Guillot, J. P., 255
Guillot, J. P. Anti-irritant potential of cosmetic raw materials and formulations, 255
Hartzshtark, A. The performance of a medico-cosmetic consultation unit, 141
Hellgren, L. see Björnberg, A., 1
Howes, D. Percutaneous absorption of 2-nitro-*p*-phenylenediamine, 215
Johnson, B. E. The influence of radiation on the skin and the basis of protection, 131
Kirkland, D. J. The mutagenicity and carcinogenicity of hair dyes, 51
Knott, C. A. *In vivo* procedures for assessment of hair greasiness, 77
Lock, S. O. Interaction of ultraviolet light, chemicals and cultured mammalian cells: photobiological reactions of halogenated antiseptics, drugs and dyes, 39
Maes, D. *In vivo* measuring of skin softness using the Gas Bearing Electrodynamometer, 189
Martini, M. C. see Guillot, J. P., 255
Michniak, B. B. A new approach to assessing sweat production, 267
Michniak, B. B. Advances in topical corticosteroid therapy, 277
Monnais, C. see Bauer, D., 113
Morganti, P. Protective effect of collagen upon irritation response of detergents, 7
Muscardin, L. see Morganti, P., 7
Norén, B. see Björnberg, A., 1
Papaconstantin, E. see Pham Duc, T. L., 29
Patel, C. U. Anti-static properties of some cationic polymers used in hair care products, 181
Pham Duc, T. L. Concentrated solutions of preservatives: their technological and analytical advantages in cosmetic products, 29
Reed, J. V. see Baxter, P. M., 85
Reinstein, J. A. see Maes, D., 189
Reinstein, J. A. see Scandel, J., 157
Saettone, M. F. Inhibition de l'action phototoxique du bergaptène par des filtres UV-A, 201
Scandel, J. Shampoos and their aesthetic effects, 159
Seu-Salerno, M. see Blakeway, J. M., 15
Short, J. see Maes, D., 189
Trambusti, M. see Saettone, M. F., 201
Turek, B. A. see Maes, D., 189
Vayssie, C. see Bauer, D., 113
Vincent, J. see Björnberg, A., 1
Walters, K. A. Permeability characteristics of the human nail plate, 231

Subject index

Abstracts of research papers (from the *Journal of Japanese Cosmetic Science Society*)
- Application of a lactic acid bacteria culture filtrate to the skin care (I) Moisturising effect on the horny layer, 73
- Studies on sodium hyaluronate from the viewpoint of cosmetic science (II) Sensory evaluation by the use test, 74
- Studies on sodium hyaluronate from the viewpoint of cosmetic science (I) Tests on physio-chemical properties, 74

Analysis; Concentrated solutions of preservatives: their technological and analytical advantages in cosmetic products, 29

Anti-irritant potential; Anti-irritant potential of cosmetic raw materials and formulations, 255

Awards
- Hackforth-Jones Memorial Award, 25
- 1982 Publication Prize, 227

Book Review; *Unwanted Effects of Cosmetics and Drugs used in Dermatology*, J. P. Nater and A. C. de Groot, 228

Chemical toxicity; Permeability characteristics of the human nail plate, 231

Collagen; Protective effect of, upon irritation response of detergents, 7

Cosmetic consultation; The performance of a medico-cosmetic consultation unit, 141

Cultured mammalian cells; Interaction of ultraviolet light, chemicals and; photobiological reactions of antiseptics, drugs and dyes, 39

Deodorants
- A new microbiological approach to the assessment of underarm deodorants, 97
- The evaluation of underarm deodorants, 85

Dermatology; Dermatology and the cosmetic industry, 247

Detergents
- Protective effect of collagen upon irritation response of, 7
- Selenium disulphide detergents. Refatting of human hair lipids after exposure to, 1

Hair
- Anti-static properties of some cationic polymers used in hair care products, 181
- human hair lipids. Refatting of, after exposure to selenium disulphide detergents, 1
- *In vivo* procedures for assessment of hair greasiness, 77
- Substantivity of perfumes to, 15

Hair dyes
- conditioning effects of hair dyes; contribution to the quantification of, 113
- Percutaneous absorption of 2-nitro-*p*-phenylenediamine, 215
- The mutagenicity and carcinogenicity of hair dyes, 51

In Memorium, 226

Medal Lecture 1983, 247

Methodology
- Advances in topical corticosteroid therapy, 277
- A new approach to assessing sweat production, 267
- *In vivo* measuring of skin softness using the Gas Bearing Electrodynamometer, 189
- *In vivo* procedures for assessment of hair greasiness, 77
- profile assessment; shampoos and their aesthetic effects, 157
- Quantification of the conditioning effects of hair dyes, 113
- The evaluation of underarm deodorants, 85

Microbiology; A new microbiological approach to the assessment of underarm deodorants, 97

Mutagenicity; The mutagenicity and carcinogenicity of hair dyes, 51

Nail plate; Permeability characteristics of the human nail plate, 231

Phototoxicity
- Inhibition of phototoxic action of 5-methoxypsoralen by UV-A filters, 201
- Interaction of ultraviolet light, chemicals and cultured mammalian cells: photobiological reactions of halogenated antiseptics, drugs and dyes, 39

Perfumes; Substantivity of perfume materials to hair, 15

Preservatives; Concentrated solutions of:

Preservatives (*cont*)
their technological and analytical advantages in cosmetic products, 29
Polymers; Anti-static properties of some cationic polymers used in hair care products, 181
Radiation
The influence of radiation on the skin and the basis of protection, 131
UV-A filters: Inhibition of the phototoxic action of 5-methoxypsoralen by, 201
Raw materials; Anti-irritant potential of cosmetic raw materials and formulations, 255
Shampoos; Shampoos and their aesthetic effects, 157
Skin
Advances in topical corticosteroid therapy, 277
experimental studies of seborrhoea: implications in cosmetology, 167
In vivo measuring of skin softness using the Gas Bearing Electrodynamometer, 189
The influence of radiation on the skin and the basis of protection, 131
Skin penetration; Percutaneous absorption of 2-nitro-*p*-phenylenediamine, 215
Sweat production; A new approach to assessing sweat production, 267
